

The image features a dark background with several concentric circles. The circles are composed of segments in various shades of purple, blue, and magenta, some of which are broken or offset, creating a dynamic, layered effect. In the center, the letters '3d' are written in a bold, white, sans-serif font, enclosed within a thin white circular border.

8. Samara Plum Elstead Lighting

New to Elstead's portable collection are a series of dual-lit table lamps that use a stunning combination of coloured blown glass and polished nickel. Pictured is the Samara Plum, with its four-way light switch that allows you to illuminate the glass base with or without the titanium silver faux silk shade. There are five colour options available.

11. Fante by Stilnovo Linea Light Group

The EPDM printed rubber truncated cone, available in two colours, is combined with an E27 globe lamp, which is an integral part of the design project. Completed by placing the white painted aluminium lampshade on top of it, without the use of any joints or mechanisms, the light can be directed by moving the metal disc.

12. Profile Formagenda

An aluminium profile serves as the base for the different variants of the Profile luminaire family. A linear system for a wide variety of applications; the most important feature is the wide range of covers and surface finishes, including vegan leather or alcantara surface, custom fabrics or sturdy powdercoated versions.
